A Bibliography on Direct Production of Leptons  
and Lepton Pairs in Hadron Collisions

Bruce C. Brown

August 1974

In preparation for Experiment 288 I have prepared a bibliography on lepton and di-lepton production in hadronic interactions. Due to the recent interest generated by the results of Exp. 70, 100 and 184 I thought perhaps it might be of a more general interest, especially in view of the Di-Lepton Workshop scheduled on Sept. 13.

There has been an attempt made to include all relevant experimental references. Due to the enormous number of recent theoretical papers the attempt to include all of them has been less serious.

Experimental References
